REACH-Declaration

Balcke-Dürr GmbH, as a manufacturer of components and apparatus, is a so-called "downstream user" as defined by REACH. We sell nonchemical products (works) only. Under normal and reasonably foreseeable conditions of use no substance should be released from the products manufactured by us. Balcke-Dürr is neither subject to the registration obligation under Article 7 of the REACH regulation nor to the obligation to compile safety data sheets.

To our best knowledge, our products currently do not contain any SVHCs (Substances of Very High Concern) meeting the criteria of Article 57 or any substances identified on the ECHA Candidate List as per Article 59(1) in a concentration above 0.1 % weight by weight (w/w). We will immediately inform you in accordance with Article 33 of the REACH Regulation of any relevant changes in this respect.

In our own interest, we are pursuing the implementation of REACH and the resulting requirements. The substances and preparations that we obtain from our suppliers are used in our production processes (e.g., auxiliary materials such as lubricants). Our processes are mainly widely used applications.

For further information regarding the implementation of the REACH Regulation in our company, please contact our EH&S department.
